Lol Im going insane. Ive been at comp 5 hours straight now looking at different tutorials about putting in your own vehicles into a map(mine were premade courtesy of cnc source). For every vehicle I dled the readmes came with vague or no directions on how to install them. I got the humvees w/ tow rep tank, and hover Mlrs. None of them I have a clue on what mostly to do with all the "strange files to a vehicle altering n00b".

Ummmmmmm I dont know what else to say. I got the files but all i want to do is insert them in map. I cannot find ONE tutorial that isnt mostly on gmax editing and has little about Level edit.
