Vy7a1as a pt icon and, yeah as a pt icon so how do i do it?

as a Pt icon and as a Pt icon............ o.......k.........they seem like the same thing to me

Go to this link --> http://skinners.cncseries.com/ <-- (best place to learn skinning and all stuff about basic 2D design/making read the tutorials and they will tell you about the programs you need

secret but i tell you anyway i'm going to bring out a very very large avatar pack soon (week ish) with lots of PT icons same size as mine if your just looking for an avatar i can garantee you can find something in there you like.

For a PT icon you need to take a screen shot of your character in game and cut round it and put it on a blank PT icon and save it as a .dds find out how on the site above (i have some blanks made by Taximes, ill realise them on the mod exchange soon as his creation, as i don't think he comes by this way anymore). cant get them to you yet as not at my computer but will do soon.
