Subject: Level Edit problem
Posted by Xpert on Tue, 13 Mar 2012 21:49:19 GMT

I get this error when I try to load up a level file.

Quote:
LEVELE~1.EXE - Unable To Locate Component
This application has failed to start because ttle.dll was not found. Re-installing the application may
fix this problem.

I looked and it's in my ren folder. Is there some place else it should be or do I have an incorrect
registry somewhere?
