Download the client version.

Although I'd highly recommend you getting Scripts 4.0 beta 4 as it has alot more bugfixes and is generally superior to RR in every respect.
scripts 4.0 stops more cheats, which is why more servers rely on it and RR is considered obsolete coincidentally the same reason some players refuse to use it (which suggests they have something to hide)

Resurrection stopps the same amount of Cheats as 4.0 do, besides that,its way more stable.
False. TT stops more cheats. Unfortunately there is a bug in the current version which does make playing a bit annoying at times but it is being worked on.
