Subject: BRenBot GSA broadcasting issue Posted by iRANian on Fri, 06 Jul 2012 18:55:24 GMT View Forum Message <> Reply to Message

BRenBot adds a few erroneous backslashes to the data it sends to GSA, this doesn't matter except that it breaks the passworded option for GSA clients so players can't join a passworded server via GSA if the server is broadcast via the BRenBot module.
