Does anyone happen to have a large-ish amount of C&C quiz questions?

I am starting to learn PHP and I have written a quiz script that puts your results into a MySQL database so you can compare your score to other peoples. Also the quiz tells you which questions you got correct and incorrect - also can give an explanation on why you got it wrong or what the correct answer was. It's fairly basic but if someone has a a set of questions I could make one.

Example Quiz Script <http://www.renhelp.co.uk/php/quiz.htm>

Example Results listing <http://www.renhelp.co.uk/php/results.php>
