trunksk gb wrote on Sun, 21 October 2012 22:08 I think he means that when he is zoomed in sometimes, he doesn't hear the firing of his gun. I've had this happen to me too many times. It just makes you wonder, am I really shooting?

I know what he means, but I am wondering if it's not stock behaviour, since the sniper rifle also claims to "zoom in" on sound, according to singleplayer.
