
Subject: [CODE] How to get the current SFPS

Really simple, but not included as a scripts.dll function and I think it could be useful:

```
REF_DEF2(cNetwork_FPS, int, 0x0081FF70, 0x0081FF70);
```

```
int Get_SFPS()  
{  
    return cNetwork_FPS;  
}
```
