Subject: Re: Blue Gdi 4.0. Hud
Posted by BlackDragonOfDarkness on Fri, 14 Dec 2012 01:04:15 GMT

G1D, if you hadn't gotten childish on my forum, I would have left this thread to die...

To those of you who think the radar looks funny, it's because it wasn't designed to be like that. I made the original of this HUD using CNC3 textures and released it as the "CNC3 GDI styled HUD"
It looks huge in this screenshot because the screen resolution was 800x600, my Renegade Config. tool won't load.

If you want to see this release on my site to see his belligerence in posting, Here's the link in a spoiler:

Croatoan wrote on Wed, 05 December 2012 04:55I love anything blue, so of course I love this.

You should consider making a scrin one and a Nod one too.

This was my original plan.
