My level editor crashed with 4.1 and now I can't get it to work.

So far, I've reinstalled ren, manually changed the install path in regedit, updated the game files, updated L.E., tried a few different version of l.e., downgraded and reupgraded my scripts and l.e. (to there respective versions), and STILL CAN'T GET IT TO WORK!

I'm in the middle of a huge mod project and I can't access it, please help!
