Iran ported some of the features to 4.0 - it's called AzazelBot on his list of releases (http://www.renegadeforums.com/index.php?t=msg&th=39663&start=0&rid=2 5967)

That may be a better place to start if you want to want to modify it yourself; if you merge several of his plugins together then you'll have recreated a large portion of OnOeS anyway.
