And yes, it is for mod support... and not just for BHP mods either. In theory things like RP2 might want different team names etc and this is the correct way to do that as per the developer spec

Rp2 has its own client for browsing servers, this is just for the Renegade map I'm making lol. I'll give this plug in a try and tell you if it does the trick!

Edit: Yeah it seems I'm getting the same issue with this plugin:
