And yes, it is for mod support... and not just for BHP mods either. In theory things like RP2 might want different team names etc and this is the correct way to do that as per the developer spec

Rp2 has its own client for browsing servers, this is just for the Renegade map I'm making lol. I'll give this plug in a try and tell you if it does the trick!

Edit: Yeah it seems I'm getting the same issue with this plugin:

The screenshot shows the RenList v1.0.7 application window. The window title is "RenList v1.0.7". The menu bar includes "File", "Options", and "Help". There are two tabs: "WOL" and "GSA". The main area displays a table of game servers with columns: "F...", "IP:Port", "Game name", "Map", "Players", and "Passworded". The selected server is "96.2.58.204:4848" with the game name "Open world bear hunter!". Below the server list is a scrollable area with columns: "Option", "Data", "Player", "Side", "Score", "Kills", "D...", "Ping", and "Time". The "Data" column shows "ccrenegade" for "gamever", "838" for "gamever", "Open world bear hunter!" for "hostname", and "4848" for "hostport". The "Player" column shows "Humans" with a score of "0" and "Kills" of "-1". At the bottom, there are "Connect" and "Refresh" buttons. The status bar at the bottom of the window reads "GSA: Total servers: 10 - Available: 10".
