Ethanal wrote on Sat, 12 July 2014 11:02: 49.2% of the US population is on some form of government assistance, so that's fairly likely

i hate being in the top 2% of earners in the country, fuckin obama ruined our practice

also ethanal how many times are you going to post that i tried adding you on steam a few months ago, man i didn't realize i was such a celebrity. glad i could make your day!

also tell liquid in that topic he posted the SS of me that i hit him as soon as he left his tank where your guy glitches on top of it lol i can't believe he's still talking about that.

noob.

also mike i just read that birthday thread .. i'm a weirdo because you removed me from your friends list for joining your rust match. makes sense. only the strangest people on the internet would join a friend's game.

nothing weird about mike dropping out of school and playing non-stop computer games for two years straight though. what are you upto 2500 counterstrike:go hours and probably 500+ in each L4D game plus hundreds of hours in countless other games ... hmm fuck you bud how bout you get a job and stop moochin off your parents cause there's damn sure no way you can play 4000 hours of video games in a year and hold a full time job unless you literally have no social experiences.
