A screenshot of a Windows-style console window titled "Renegade Master Server". The window has a blue background with white text. The text shows the server's startup process, including loading various plugins (FirstBlood.dll, Spectate.dll, Sounds.dll, PlayerSwap.dll, Cinergy_Crates.dll, MapTime.dll, Ping.dll, Donate.dll, Command.dll, CheckPlayerName.dll), reading configuration files (anticheat.ini, acallow.ini), and handling errors with HeartBeat lists. It also mentions "File-Hash Anti-Cheat Enabled", "Auto starting game", and "Initializing Westwood Online Mode". The window ends with "Got server list" and a single character "G".
