shaitan wrote on Sat, 11 October 2014 11:11You want me to go restart all of the server owners brenbots, for multiple people having the same problem? That'll be interesting to try to do.
I had the same issue this morning, and I've even had my hosts file directed towards the actual IP since he setup the mock gsa.
This morning there was zero servers showing on gsa, right now there is one.
Just bring XPIS down and they'll all restart.
