Then we should add a checkbox in LE that would make that preset ignored by tracking.

Least chance of breaking stock functionality that way and only newly added stuff would be affected.

I gotta disagree on this. The new behavior is much better and fixes tons of maps with turrets that have their origin at the bottom. The only objects that get their tracking disabled in 4.2 right now are ones that can't move. Objects attached to other objects behave identical to stock when dealing with homing.

The current logic isn't checking if objects are attached which tells me you have yet to test it against many cinematic objects otherwise you'd be noticing issues.

Jonwil said its checking if its attached. Maybe its not working correctly, but if it does what he said it shouldn't be an issue. Can you give me a map or single player mission where you have spotted an issue?
