ok... I explain...
we are searching for a web site designer, someone who can make a web site for Genegade.
I have web space + a forum, so the only thing we need is a web site.

forum: http://genegade.laeubi-soft.de/forum/index.php

the mod is about renegade into generals. to be a bit more clear, we make a renegade mod, with generals structures and vehicles.
now, if there is any interest in making a web site, then please reply or mail me at
slayer143@hotmail.com
Thanks

(ps. sorry for spelling mistakes, English is my second language.)
