Heh, i actually forgot the add the M thing on his head, but it is added now . Amazing how many clothes he wares, haha.

What do u mean making an eva unit as a vehicle? I dont understand.

It took me about 3 hours to get right, The hair was actually easy, just make a half sphere which is about 100 polygons, and lift up some polygons to make it.

This was made with Milkshape 3d so that is all easy. I love milkshape 3d
