FerhagoOpen always.dat with xcc mixer or a similar tool.

Find E_Flesh1.w3d and E_Flesh2.w3d

Extract them and edit them and put them in you data folder. They dont have to be in a mod to be used

You might as well extract e_master01.dds too if your going to edit them. They wont show properly without it.

Things can get very messy this way

OMG!!! LOL!!! He's exploding!!!!!!!!!
