The screenshot of the Harrier hovering over the hangars looks great ...can't wait to play this map!

I wonder whether you could incorporate your M2 Bradley model into the map somehow? Maybe have a smoking wreck of a Nod light tank in the desert outside the base?

Personally, I don't think there's any reason why GDI couldn't have F-15s. It is just a game after all, but somehow I don't think that the units you have access to in Tiberian Dawn represent the entire GDI armed forces.
