Maybe, but it is a nice addition if you play Multiplayer Practice or LAN.

But can't we ask the server owners to install the mod on their servers?
Another thing if you don't have the Wav file copied, you will hear only "Building." and missing the warnings.

BTW, GDI has similar voices for Weapons Factory:
"Building in progress, please standby."
"Warning, Vehicle construction imminent, please clear the zone."
"Construction complete."
Then...
"Unit ready".
