FerhagoAnyway. Jelly you claim to have taken time to make to make this.

I made an exact copy of your pkg from scratch not taking anything from your pkg and it only took me 30 minutes.

Cool man, can I have a copy, we'd just like to use on our server for fair advantage on matches. A mod based only on the classic maps with no modifications to the game. A rip of Renegade - Cnc Mode.

For some reason, Blaze and Jelly's Rip had bugs, which had modified (reduced) certain damage to and from some units. But the result was equal for all. This however did not closely resemble the original game, which is what we desire.

Thanks
