RenGuard Staff:

I've been meaning to ask you for awhile now: is there is anything the community (or more specifically myself) can do to help accelerate the release of (or improve the performance/stability of) your project?

I'm serious about this, too. Most of you GSA-ers already know I dont play Renegade anymore (I've found a new game weeeeeeee), but I still want to see this community stay alive. I have unused resources in my lab at home that could be utilized free of charge by your staff in just about any capacity or setup needed.

Any capacity. I know you've had your share of run-ins and challenges, so please help me help you however I can. And no I don't need source code as a collateral (lol) *wink*.

Sean
