Renegade always does that. It isn't 100% foolproof.

About the GFX cards... I'd say the 9800XT is aimed primarily at gamers, so it will perform best for gamers.

However, all the cards mentioned here are high end, top of the line, insane performance.

I'd be happy with either card, but if you want best performance, listen to all the others here and go with the XT.

And for whoever posted about the \$2000 Quadro card....

It is for graphical software rather than gaming.

And so is.....

this
