One of the games I have been playing in my absence, Starsiege, has a similar type of script, which bans all AOL users...unless the user has a key script, which allows them entry. The key script is specific to that person, so they are not interchangeable. I suggest you get in touch with the owner of this page:

<http://www.rockshq.com>

he is the creator of that script...he may or may not be able to help you with this. That's sort of a stab in the dark, since Renegade is probably coded differently, but it's worth a shot.
