Subject: computer questions on this system i'm getting
Posted by forsaken on Fri, 12 Dec 2003 23:16:27 GMT

cool, thx, looks like i'm getting the lesser of the FX 5900 series, but looking at the ultra 256mb review the 156mb shouldn't be bad at all

I got one more question,
I currently have on this buying list a AMD certified CPU Fan and Heatsink, and this was before I threw the FX 5900 in instead of the FX 5600 it had before, should I pick out the option for:

AMD certified CPU Fan and Heatsink + 3 extra case fans

or AMD certified CPU Fan and Heatsink + 2 extra 3-color led case fans

So basically, will the FX 5900 run with just one fan, or will it need one of the 2 of above since it has a lot more power than the FX 5600?
