ok this is an example.. not a good one.. i joined crimmys sniper server and it had a low KBPs and warped a bit

watch the enemy move huge distances in a second. THATS what it is like fighting some people in a 32 player game.. and you cant say it is me or the server becuase nobody else warps like the guy teleporting side to side

Clip

remeber i said not a good example

and ignore my fps.. it goes like that while recording 0.5MB/sec of data into avi format :/
