Subject: Need Help, Cant install Renegade
Posted by Charjeff on Tue, 23 Dec 2003 17:58:57 GMT

Intel pentium 4 Processor 2.50 GHz
256MB DDR
40GB ATA Hard disk Drive
64MB Graphics card (Called "Intel Extreme Graphics" came with the comp.)
RealTek AC97 Audio

I went to the Renegade Westwood website, and had it check my computer to see if it could run the game and it said I was over 4,000% above the minimum requirements. I also tried that alternet installer, but that only brought new problems.
