Interesting Thread. Heh.

You know, when Clinton was president, there was a joke about the Thesaurus search in Windows WORD, where you could type in all kinds of things like "impeach CLinton", and the program would find a match for "good idea".

Look, the president is going to be made fun of, he is the highest profile n00b in the country. When Clinton was president I got 8 years of Clinton jokes in the late show monologues. now it's time to roast THIS guy.

Don't get mad at google.com and stop crying foul. Clinton was ridiculed for 8 years by every medium possible, and GW Bush Senior was and Ronald Reagan was.... have a FREAKIN sense of humor about it. It is supposed to be funny.
