Also, as Nod on City Flying you can rush the GDI power plant with a buggy. Use the right side, run as far as behind the Barracks, get out and heal the damage the AGT has done to you, get back in and go the rest of the way to the power plant. You might be able to reach the AGT from going around the front of the barracks but I haven't tried it. Imagine being 2 minutes into the game and GDI sees "GDI Advanced Guard Tower destroyed"..

"WTF?"
