Subject: How to "duplicate" the Renegade font effect
Posted by Havoc 89 on Thu, 01 Jan 2004 23:26:16 GMT

I acturally made another one, but after i did the text stuff, i went to filter/texture/texturizer

i then changed texture to sandstone set scaling to 155% and relief to 1

i then went to filter/texture/craquelure

i set crack spacing to 20
crack depth to 3
and crack brightness to 5

and then i got this

btw i used Photoshop 5.5
