that makes sense lol, there can be set only ONE remote admin port.
If BR. 1.3 uses it BEFORE BRenBot 1.31 then BRenBot cant use it becaus its 'in-use' and vice versa. You cannot run BR 1.3 and BRenBot 1.31 simultaniously.

<FanMapsBot> Error: could not find game results logfile :(

Thats all i get when i just ran RenStat and restart BRenBot, it doesnt crash for me, oly this tiny error. But it still functional and working the way it should after this.
