egg098Until the next version of BRenBot's out, if your server uses an IRC channel, you could script them into an ircbot that would do a !msg into the game on the command - thats what I do!

Could you maybe pass me that script of yours pretty please i dont know much about scripting :S (email to zunnie@quicknet.nl if you want)

It would be cool if we can use this on our servers, its not some amateur 4 or 6 player server We host a 12/14 player Sniper server, two 10 player AOW servers and a 30 player AOW server on Europe. Some of the commands i had in BR 1.3 i miss really alot :'(
