IceSentry

Modding this game is not worth my time, or learning to. It's not the best war game that's out there. As for contradictions, do you know what the difference is between a moron, and an imbecile? Do you know what the difference between a moron and an idiot? Do you know the difference when you're calling people these names? A moron has an IQ is 60-70, an idiot is between 50-60, an imbecile is between 40-50. And imbecile needs non stop care. That's what you are, you need non stop care. And who cares about modding this game. I went as far to make a skin, but thats about it, I didn't see any real value in modding for this game.

Well if you don't like this game, wy are you even here.
