Dude chill

Ok 1st off

That happened to me and now im ok so what you have to do is

Uninstall renegade so it wipes out all skins and files that would cause you not to be pure...

reinstall renegade and make sure your running version 1.037 if not it will ask if u want to update

then unsinstall rengaurd

start>settings>control panel> add/removeprograms

Now after that go back to the download page for rengaurd

You have a few options

1:RenGuard Client

2:RenGuard Client Safe Installer

3:RenGuard Server-Side Client

A: Windowns server

B:Linux Servers

A and B fall under number 3

Once you have decided which one will suit you the best

Pick:

Renegaurd.com

mirror1

mirror2

There are all the same so just pick one (I picked mirror2) but wat ever you want

After you clicked on it save it to desktop

Once done downloading it from online

double click on it then follow directions (its easy)

ok then just launch renegade like normal and click on the renegdae button to play

NOTE THIS YOU WILL HAVE TO PLAY W/O SKINS FOR A WE BIT UNTILL WE CAN  
FIGURE WAT SKINS ARE ALLOWED AND ALLOW THE ONES THAT WE KNOW AS SKINS

AND ARENT CHEATS

\*\*\*\*good luck\*\*\*
