OK

just uninstall rengaurd then reinstall it

TO uninstall

start>settings>control panel> add/remove programs

pick it from the list and totally unistall it

Go back to the download page

Pick which one will suit you the best(U shouldnt pick safe install if it messed u up before   )

Ok i just picked mirror 2 under the 1st set of three and i HAVE HAD NO PROBLEMS

Save it do your desktop

once done downloading it double click on the icon

follow directions (its easy)

then just launch ren like normal

MAKE SURE IT SAYS WELCOME(WOL NAME)

GOOD LUCK
