Subject: Safe Installer fix for Setup.exe crashing, auto-update fail
Posted by Slash0x on Sun, 11 Apr 2004 04:55:27 GMT

Installed just fine with me. I just think most of the RG servers will be dead for awhile before people start to figure this out. Hopefully you guys can make this happen.

Either servers will use it and gradually people will get it, or servers will dislike the low content of players and deal with their mods doing the dirty work.

I just hope all that good work doesn't go to waste. Cheers!
