ya make the muzzle break wider than the barrel. It would also look cooler if you made the barrel in multiple peices. And make it so it "retarcts" as it shoots. Like real artillery.

like the barell of the m82

<http://www.combatindex.com/hardware/detail/gun/m82.html>

i forgot the technical terms for it.

here is what you based the model off of

<http://www.fas.org/man/dod-101/sys/land/m110a2.htm>

make the barell like this

<http://www.fas.org/man/dod-101/sys/land/m109a6-11.jpg>

i think it would look much more menacing.
