Quote:1. Yes, that statement was correct, but doesn't have to do with this. I'm talking about the fact that you think that I don't work on MW, when I do a lot more than you think.

Don't see it yet... Words are meaningless 90% of the time when it pertains to people like you who promise the world and just end up lying through their teeth.

Quote:2. I know everyone else can do it, that's why I'm not fucking showing it off. I'm only using it to prove that I'm working on MW.

How does saying "I've got other things to do" proving that you're working on it?

Quote:3. I'm only saying that because I only get 1-2 hours on the computer per weeknight. (No, I'm not complaining) This contributes to your idea of me doing nothing, which is why I brought it up in the first place.

"lol"
