I have gone to play a server today that had 10 ppl in but I could not...

I cgot to the screen where you get to see all the players in the game but nobody was there and the join button was in-active...

I wen't in to IRC (I am moderator aswell) and there wer people in and playing yet I could no join...

Can anybody tell me why this still ocurs even after I rebooted.

P.S. I often have problems wioth the locating servers screen aswell?
