Alright, I have serious problem with ScanDisk. I've closed all other applictions except explorer and systray, but it still keeps resetting all teh time when Im using the "complete scan"-option. Looks like something is writing something to somewhere every 10 seconds or so, but I don't know what it could possibly be. I have Windows ME.

Can anyone help with this? I've scanned the PC for viruses and stuff like that with a big keg 'o programs, nothing found. It shouldn't be a network issue either...
