The Sniper.

An anti infantry light vehicle repelling unit. Many people argue about why snipers should effect vehicles at all. Havocs and sakuras shoot jet propelled shells. Deadies and balck hand shoot armor piercing rounds. Think for a minute. A helicopter flies over, a sniper shoots, the bullet pierces the armor, destroys equipment, maybe hits the pilot, the heli explodes. the vehicle has a much better chance of killin the sniper than vice versa. the sniper's only asving grace is its ability to hide. If you expect a sniper to be in an area then buy a more heavily armored tank that snipers DONT affect. In fact I think that if a humvee drove about and got hit by a sniper then its over for the hummer. If you disagree with this, then think harder. The sniper vehicle effect belongs in renegade.
