I would have to respectfully disagree about the snipers. While they are espessially good at killin infantry, they should also be good at killin vehicles. If i see a heli comin toward me, im goin to shoot no matter what gun i am carrying. This game is a combat game, not a flying game. IF people would like to fly free with no sniper fire oriented at them, buy one of those. It is oriented on destroying the bases and killing people any way possible. This includes shooting down helis with the most powerful anti-heli weapon, in this case the sniper rifle. I have posted a few topics on this.
