Subject: need help to format my computer
Posted by Majiin Vegeta on Sat, 22 Mar 2003 02:58:15 GMT

u have no BIOS...with out that..you wont be able to start the computer........it would be a blank screen......

try pressing different button to get into it at start up...its sumtimes F1,del,tab ...yada yada...hmm

could try just stikin the bootdisk in the floppy drive and it should do the rest...but i think XP dont need a boot disk its all on the CD...
