My Radeon 9700 Pro > FX 5200. I've seen them used side by side at max settings. The difference is very noticable. There is not that noticable of a difference between the 9700 Pro and 9800 Pro. I've run both and the main difference was frame rate. A max of 115 fps in Ren on my 9700, 138 with the 9800.
