The Day after tommorow is a case of when not if. Worst case scenario, it happens in the next ten years, setting humanity back by centuries. Next fifty years massive global economic collapse as the entire north-west hemishpere is evacuated. Next 100 - 150 years we should be able to pull through without evacuation. in the unlikely event that we manage to not trigger this in the next 200 years it'll be a case of "meh, who cares". If we manage to pull through the next 3 centuries it might never happen. Best guess is it'll happen sometime in the next 50 - 150 years.
