I got a AMD Athlon 1800+ XP (overcloaked to 1.8Ghz) with 256DDR PC2100 and it takes me about 10-15 seconds to load (depending on Map and/or Server).

My old PC i had something like 380SDRam PC133 and it loaded it in a matter of seconds with 566MHz P3 Celeron.

Ram should speed it up so,
