Subject: How can I increase my FPS?

Just a question, but what Resolution are running at?

I have

AthlonXP+ 1800
384 333mhz DDR
Geforce 4 MX 420/64mb

and I hardly ever get down to twenty unless there is lots of stuff going on. From the sound of it, you're running at 1600x1200. Bump it down to 1024x768 and your FPS will skyrocket.
