I released this map in March and since then has been downloaded 100+ times. I think this is pretty good, but I am looking for your feed back on the map; things such as design/layout, playability, etc.I ask this so I may take them into account for my next map.

I would also like to be informed of any bugs big or small, if there are enough of them I may do a details on the map.

If you like the map, ask your favourite servers to host it! If you don't like it, ask them to host it anyways.
